Empowers operational efficiency with exceptional customer satisfaction

Inventory Management

MPD provides a powerful inventory management module designed to help businesses maintain accurate and efficient control of stock levels:

- **Stock on Hand:**
Gain real-time visibility of your current stock levels to avoid overstocking or understocking.
- **Stock on Hand:**
Gain real-time visibility of your current stock levels to avoid overstocking or understocking.
- **Stock Transfer:**
Easily transfer stock between vans to ensure that sales representatives always have the inventory they need.

Route Planning

Optimize your daily sales operations with MPD's intelligent route planning feature:

- **Sales Route:**
Plan and assign daily routes for sales representatives, ensuring efficient visits to customers.
- **Order, Return, and Payment:**
Organize customer visits for taking orders, processing returns, and collecting payments, reducing wasted time and increasing productivity.

Delivery Management

Ensure seamless delivery operations with MPD's delivery module:

- **Scheduled Deliveries:**
Coordinate and deliver goods to customers on their requested dates, enhancing customer satisfaction.
- **Order, Return, and Payment:**
Monitor and manage deliveries in real time to ensure accuracy and timeliness.

Day-End Closing

Simplify the end-of-day process with MPD's streamlined closing functionality:

- **Stock Reconciliation:**
Close out daily stock levels, ensuring accurate inventory records.
- **Daily Summary Reports:**
Generate and print comprehensive daily summaries, providing insights into sales, returns, payments, and inventory changes.
